## Commander's Message Cdr. Jud Champlin, AP

The Minnetonka Power Squadron Executive Committee, along with its many subcommittees, is just wrapping up the 2009 boating season. We have had many fraternal and civic functions and I hope you were able to partake in at least a few of them. Past Commander Crowley even taught the Operations Training course with the 'classroom' located at Streater Cove.

We are now moving into our 'education season.' Information about class schedules can be found on our web site. Please consider attending one of

the classes being taught this year and support the education 'leg' of our triangle.

*"When the water turns hard, its time to hit the classroom!"*

For those of you who have not taken the Seamanship class you will want to get that in before Spring so that you are able to qualify for an Island Sticker. There are two Seamanship classes scheduled before Spring. Be sure to sign up!

I would also encourage you to attend our General Membership meetings that

occur during the off season. The next one is 7:00pm November 19th and will be held at the Yacht Club in Spring Park. This is a great way to keep up to date with our activities and to ensure that you have a say in running our Squadron.

*Continued on page 2*

## Commander's Message (Continued from page 1) Cdr. Jud Champlin, AP

The District 10 Fall Conference is being hosted by the Minnetonka Power Squadron this year. Squadron members from all over Minnesota and Wisconsin will be descending on Minneapolis. This will be a fun kid friendly event with many seminars and social functions. Lets show a good turn out and welcome all of our sister Squadrons when they visit.

A sign up form is included in this issue.

Finally, another reminder to apply for a Merit Mark! This is also a requirement for an Island Sticker next summer. The Merit Mark form can be filled out on line and is located here: [http://www.minnetonkaps.org/weblog/?page\\_id=751](http://www.minnetonkaps.org/weblog/?page_id=751)

Thank you for your continued support of the Minnetonka Power Squadron.

## Hand Full Lt. Bob Brown, P

In every organization there is a hand full of people who make it run. These people clean bathrooms, pavilions, cut grass, teach classes, work the boat show, when called give up a afternoon on the sandy side to fix electric problems, work parades, or work boat ramps, inspect our boats,

and make life great for our members. Unfortunately it is a few that do the work. There are others that complain and do little or nothing and become a HANDFUL.

This next year I ask all of us to take a good look and ask are we a hand full or a HANDFUL. We need all of you to be part of the Minnetonka Power Squadron team.

Please contact me if you have any questions and thanks for a great summer !

## Pork Chop Fest "Thank You" PC. Tracy Gustafson, AP

The Pork Chop Fest evening was a great success with lots of helping hands spreading the love. The night went perfectly!

Amy Lund seasoned and rubbed the chops and her team mates Jay Lund and the expert grill crew cooked them to absolute perfection!

Thanks to Karen Buellesbach, Greg Buellesbach, Karen Christenson, Barb Ward and others for helping with setting up, cleaning the pavilion, both before and after, and check in!

A special thanks to the person who got up Sunday morning earlier than I did and swept up the evidence of a fun night in the pavilion!

Randy Gustafson finally returned to the squadron docks at 2:00 A.M. after getting the final load of equipment and band members safely back to land!

Thanks to all who participated!

Kurt (Sir Chop) and the Pork Chop Band kept the dance floor full until the music stopped!

## Island Manger Report Jim Revane, S

A great big "Thank You" to all the members that have been pitching in!

Since the last TonkaNauts issue the burying of the power lines has been completed. There is more about this later in this issue.

Remember "Docks Out" is scheduled for Saturday, October 10th. The first shuttle will be leaving from the Excelsior commons dock at 0900 and another at 0915. Lunch will be

provided and there are plenty of additional tasks to be accomplished.

Two house keeping items:

We are still having problems with garbage left in the pavilion. Please remember to pick up after yourself.

The cigarette butt issue has not improved. Please, lets keep them off the grounds. If you use an ash tray properly dispose of the butts after you are finished.

Enjoy the island and if you have any questions please feel free to contact me at 612-710-6378.

# WIN!

*Educate  
yourself and  
Learn boating  
skills and win!*

*Boating is fun...*

*We'll show you how!®*

## *Win Valuable Prizes!*

Take and complete a USPS Course  
between July 1, 2009 and June 30, 2010!

*United States Power Squadron members can take any one or more of the following courses between July 1, 2009 and June 30, 2010 to be eligible for the following prizes:*

<b>Seamanship:</b>	<b>WIN A HANDHELD VHF RADIO</b>
<b>Piloting:</b>	<b>WIN A HANDHELD GPS</b>
<b>Advanced Piloting:</b>	<b>WIN A SET OF NAVIGATIONAL SOFTWARE</b>
<b>JN:</b>	<b>WIN A CHARTPLOTTER</b>
<b>Weather:</b>	<b>WIN A BAROMETER</b>
<b>Marine Electrical Systems:</b>	<b>WIN A MULTIMETER</b>
<b>Engine Maintenance:</b>	<b>WIN A MULTIMETER</b>

*To enter the drawing, all you need to do is the following:*

1. Take and complete the qualifying course or courses between July 1, 2009 and June 30, 2010
2. Successfully pass the examination before June 30, 2010
3. You will be automatically entered in the drawing

*The Available Prizes:*

- |                                  |                                   |
|----------------------------------|-----------------------------------|
| 1. For Seamanship                | (3) Handheld VHF Radios           |
| 2. For Piloting                  | (3) Handheld GPS                  |
| 3. For Advanced Piloting         | (3) Sets of Navigational Software |
| 4. For JN                        | (1) Chart Plotter                 |
| 5. For Weather                   | (3) Barometers                    |
| 6. For Marine Electrical Systems | (3) Multimeters                   |
| 7. For Engine Maintenance        | (3) Multimeters                   |

*The winner's names will be drawn at the 2010 Governing Board held in Seattle from August 30th through September 4th, 2010.*

## USPS District 10 - 2009 Fall Conference!

USPS District 10 – 2009 Fall Conference

# IT'S ALMOST TIME!

To mark your calendar and plan for the

## Minnetonka Power Squadron District 10 Fall Conference

The Conference is set for November 6, 7 and 8, 2009 at the  
Minneapolis/St. Paul & Mall of America Hilton, Bloomington, MN

### Why should I attend the Conference?

Education, Communication with other squadrons in District 10, and Entertainment.

The evening of Friday, Nov. 6 is dedicated to entertainment.

The "That's Entertainment" party features the Minnetonka Power Squadron's  
famous music group "Knot Work'n Band".

Come dressed fit to kill! Be a Hollywood star, a dancer, a singer, a boat captain, etc.

On Saturday there are Workshops for all departments that make up a squadron –  
Executives, Secretaries, Treasurers, Education Officers, etc.

There also is a Workshop for 1<sup>st</sup> timers who are new to USPS squadrons.

Saturday, Nov. 7 and Sunday, Nov. 8 feature educational programs/seminars.

### What else?

Beautiful, elegant sleeping rooms with excellent group rates!

Superb culinary for those of us who love to eat!

Indoor swimming pool to help us remember the great times of being in the water.

Shopping at the Mall of America (complimentary shuttle services to and from the hotel).

Explore downtown Minneapolis via the new light rail that is located close to the hotel.

### The Minnetonka Power Squadron Conference Committee

has put together a very creative outstanding weekend.

Except for two District Committee meetings Friday, all events are open to all attendees

Sign up, make reservations and come see for yourself.

### Look for the Registration Form on the following page

Have questions? Need more information?

**THAT'S ENTERTAINMENT**

On Friday the Sixth,  
 Come take a Red Carpet stroll  
 For you are a Star, and must play the role.

You may be a Gable, a Garbo, Monroe,  
 A Dancer, a Singer, perhaps you're a Troll.

We'll have fun and games and food for the soul,  
 Your enjoyment, my friend is our ultimate goal.

Live Music Presented By:  
**Knot Work N**

## Underground Electric at the Island Steve Leighton, AP

Many of you have probably been wondering what's been going on with the power at the Island.

It was decided earlier this year that we should have the power lines buried underground and with much help and support from Gabe Jabbour we were able to get the cost reduced dramatically from the initial proposal. Gabe also helped by providing much of the equipment and transportation required which saved us thousands of dollars. (A special THANKS to Gabe for all his help and support).

Excel Energy started this project just before the 4<sup>th</sup> of July weekend and it's quite fascinating exactly how they do this.

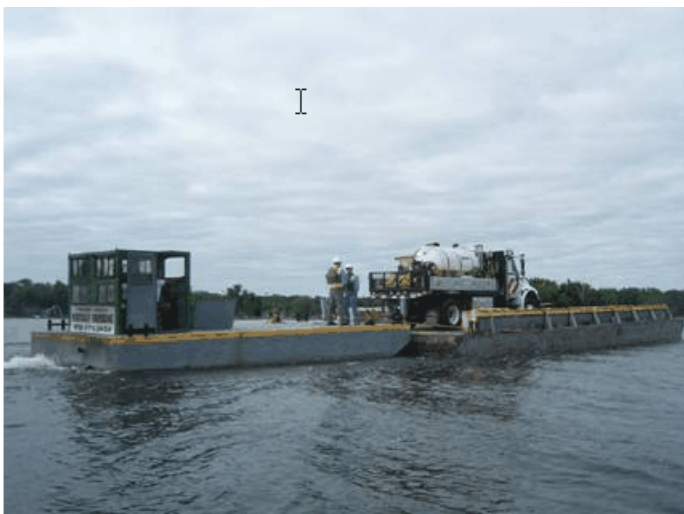

Directional boring is used to run the lines underground using a steel pipe boring machine. While the machine operator steers the steel pipe another operator walks above the ground with a locating meter keeping track of the

location of the boring head. He then radios to the operator telling him which direction to steer the boring machine.

The initial run was started just west of our beach area. It was 4 feet underground and ran 800 feet to a predetermined mark on top of the hill east of our property. They only missed this mark by less than 2 feet. It was really amazing!

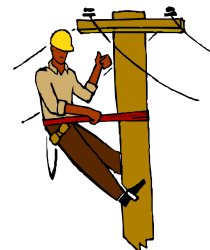

After the pipe was ran up the hill a locator wire and 2 PVC pipes, one for the electrical line and one for the telephone line, were pulled back through the hole. When they have the PVC in place, they use a vacuum to pull a string through the line. The string is attached to a rope and the rope is attached to the actual power line. The lines are then pulled all the way to the transformer. From that point they turn the equipment around and run it in the other direction to the transformer located in the field next to the channel using this same procedure.

Having the line buried 4 feet is enough clearance to run the lines under our pavilion, existing dock electrical lines and all of the water lines. You can't tell were the lines are.

Equipment being shuttled out

That was the first stage. After nearly two months another line crew showed up to actually hook-up the power to the transformers, remove the overhead lines and then drop the existing poles.

This second stage was completed in September. The telephone company still has some work to do getting their lines hooked-up, but the power lines are complete.

Having the power lines underground will help us tremendously in keeping the power flowing at the Island especially during storms. We have lost power many times due to tree branches that have taken the lines down. Another addition to the lines being buried was a new circuit breaker located at the pole by the back docks. This pole and line feeds the properties to the north. Now if a tree takes that line down it will trip the breaker and not bring our power down. This will be a HUGE improvement over what we have had in the past.

Also, as many of you, know our field is a designated emergency landing area and without the power lines running across our field it will be much easier for helicopters to land.

Just one more fine improvement to our great facility!

# Underground Electric Continued

## Minnetonka Power Squadron Aquatennial Event

Don Duncan, AP & Lt. Helen Duncan, P

On July 23, 2009 members of the Minnetonka Power Squadron provided lunch and boat rides for individuals associated with the Minneapolis Aquatennial. Eleven Mid-West Queens, 46 candidates for the title "Minneapolis Aquatennial Queen of the Lakes" and 7 chaperones were picked up in Wayzata on boats piloted by Don Duncan, Steve Leighton, Jeff Schott, Arlan Opstedal, Rob Gaddes and David Fine. They were transported to Streater Cove, given lunch by Helen Duncan, Connie Korstad, Paula Harter and Tracy Gustafson. Lunch was followed by a cruise around the lake before the return trip to Wayzata.

Dan Goldman, Mike Dorn, Jim Crowley

and Bob Brown provided boat rides for 41 Visiting Dignitaries and Aquatennial Ambassadors. Greg Korstad did a superb job as dockmaster directing the loading and unloading of the boats at the docks near Sunsets Restaurant in Wayzata. All involved were then invited to the Commodore's Party in the evening at the beautiful home of Jim and Landi Patterson near Lake Harriet.

After the event Bill Rissmann, 2009 President of the Aquatennial Ambassador Organization, wrote to the Squadron: "On behalf of the Aquatennial Ambassador Organization (AAO) we would like to thank you for the generous in-kind donation of the boat cruise for our candidates,

Midwest Queens and Visiting Dignitaries from Minnetonka Power Squadron to the 2009 festival.....We look forward to seeing you during The Best Days of Summer, July 16-24, 2010!

Ashley Natlie, Ms. Robbinsdale, wrote: "Power Squadron – Thank you so much for donating your boats & your time! We had a blast with you all! It was one of my most favorite events! Thanks again."

This is a great service the Minnetonka Power Squadron provides annually for our greater community. Thanks to all who participated. It truly was a blast!

Minnesota Midwest Queens

## The USPS Roger Upton Video Award!

Bud Broekma, P

The USPS ® Roger Upton Award recognizes excellence using videotape to include both a videotaped program presented to an audience or broadcast via cable or network television and public service announcements (PSA) broadcast or network.

Mark and Tyler Hanus put together two great videos and not only did the video's win, they took first and second place! The awards were presented to Mark and Tyler at the National Meeting held in Kansas City, September 9-12.

## National USPS Youth Poster Contest Editor

Speaking of awards, Kade Retterath, age 8, won 1st place in the district competition and 2nd place in the national competition in his age group for designing and painting a boating safety poster.

The Boarman National USPS Youth Poster Contest was open to all children in three age groups, 6 to 8, 9 to 11 and 12 to 14 with this years theme "Boating Is Fun"

Kade will receive his honors at this years D-10 conference held in Minneapolis, November 6th, 7th & 8th.

Kade lives in Mound and attends Shirley Hills Primary School.

## Does Green Equal Clean?

Reprinted from BoatU.S. Foundation for Boating Safety & Clean Water #47

These days many boaters are looking to green their boat cleaning routine by searching for environmentally friendly cleaning products—and manufacturers are responding. A quick scan of cleaners on a boating store shelf reveals a wide range of products with various green terms including: Biodegradable, Non Toxic, Phosphate-Free, Recycled, EPA Design for Environment, Eco-Friendly Formula, Environmentally Safe, Environmentally Friendly, and perhaps our favorite, Environmentally Smart.

What do these terms mean? Can you believe the claims? And most importantly, if a product is truly "green" will it still clean your boat? The BoatU.S. Foundation set out to answer these questions.

We put 20 boat soaps to the test. With so many products on the market, we stuck to general boat soaps and all-purpose cleaners to keep things simple. Many of the soaps tested make green claims on their labels. We also, as a control, included a few tried-and-true cleaning staples that do not make any environmental claims. We sent one set of cleaners off to a university laboratory for toxicological analysis and we kept a second set for our hands-on cleaning effectiveness tests.

### Labels - Close Up

A quick scan of the labels on our tested cleaners reveals a wide range of green terms. Can you believe the

claims? In a nutshell, no. Unfortunately for consumers, there is no regulation for the use of claims such as "non toxic" and "biodegradable" that are found on many labels. Our tests confirm this as we discovered a few "green" labeled products appeared to be among the most harmful products tested, and some conventional products were far less toxic than suspected, yet made no environmental claims on the packaging.

The least toxic product in our test 3M Boat Soap makes no environmental claims on its packaging, while the most toxic and one of the least biodegradable products in our test includes terms such as: Ecological, Minimum impact on aquatic life, fast and complete biodegradability, and phosphate free on their label.

### Results - Can Green Clean?

When looking at environmental impact it is clear to see that more products performed well on toxicity than biodegradability. When determining the overall environmental impact the two factors are not weighted equally. The time it takes a product to degrade is more important than its initial toxicity. The longer the products lasts in the water, the more time it has to impact aquatic organisms. We asked our university partners, "Is it better to have a highly toxic product that biodegrades rapidly, or a less toxic product that does not biodegrade?" They told us that the more toxic product that degrades rapidly would likely have less overall

environmental impact. For this reason we weighted biodegradability higher than toxicity in our evaluation.

Both Thetford Marine Boat Wash and Meguiar's Gel wash were nearly 100% biodegraded in 4 weeks. ConcrobiumXT Ecowash Gel was the hands down winner in biodegradability with nearly 100% degradation in only 2 weeks.

Weighing all the factors: cleaning performance, toxicity, biodegradability and cost, our Staff Pick is Thetford Boat Wash. This cleaner comes in a concentrated, cost-effective formula, cleaned the boats relatively easily, with low toxicity and high biodegradability. It is also readily available at major boating supply stores nationwide.

For the full breakdown of how each cleaner performed, see the chart on the next page. Follow link below to view the complete article at BoatU.S.

<http://www.boatus.com/foundation/Findings/47/default.asp>

## Does Green Equal Clean? Continued Reprinted from BoatU.S. Foundation for Boating Safety & Clean Water

### How The Green Cleaners Stacked Up In Our Tests

	Toxicity	Biodegradability	Cleaning Performance	Cost
Thetford Marine Boat Wash*	Excellent	Excellent	Good	\$0.75 - \$1.50/Gallon
Meguiar's Gel Wash	Excellent	Excellent	Poor	\$0.22/Gallon
Concrobium/AT EcoWash	Good	Excellent	Good	\$7.50/Gallon
Starbrite's Yacht Brite Brite Wash	Good	Good	Good	\$0.57/Gallon
Simple Green All-Purpose	Good	Fair	Good	\$0.59 - \$1.90/Gallon
4U Concentrated Cleaner	Good	Fair	Good	\$1.68 - \$3.37/Gallon
3M Marine Boat Soap	Excellent	Poor	Good	\$1.67/Gallon
West Marine Pure Oceans Boat Soap	Fair	Fair	Good	\$0.56 - \$1.12/Gallon
Starbrite Sea Safe Boat Wash	Good	Poor	Good	\$0.58/Gallon
West Marine Crystal Boat Soap	Good	Poor	Good	\$1.25 - \$2.50/Gallon
Spray Nine Boat Soap	Fair	Fair	Fair	\$1.25/Gallon
Trac's Green Clean Boat Soap	Good	Poor	Fair	\$0.17/Gallon
Soft Scrub with Bleach Cleanser	Poor	Fair	Excellent	\$0.30/Oz. (Direct application)
Spray Nine Green Marine Multi.	Poor	Fair	Good	\$0.21/Oz. (Spray)
Thetford Marine Deck Cleaner	Poor	Fair	Fair	\$0.41/Oz. (Spray)
West Marine Pure Oceans All Surface	Poor	Fair	Fair	\$0.44/Oz. (Spray)
Boatlife Boat Cleaner	Fair	Poor	Fair	\$1.65/Gallon
OrPine Boat Soap	Good	Poor	Poor	\$0.20/Gallon
Extrema Simple Green Motorports	Poor	Poor	Excellent	\$0.19/Oz. (Spray)
Ecover Heavy Duty Boat Wash	Poor	Poor	Good	\$0.44/Gallon

## Green Glossary

Editor

Below is a list of the most commonly used "Green" terms:

**Biodegradability** - relates to the amount of time it takes a substance to break down into harmless components.

**Toxicity** - relates to the negative effects of the substance on all types of organisms.

**Phosphate-Free** – Means that a compound is free of phosphates. Phosphates have long been used in many cleaning products and fertilizers. They can also be found in sewage, urban and agricultural runoff. Phosphates promote plant and algae growth that can be harmful as it depletes oxygen in the water needed by other organisms.

**Post Consumer Recycled** - Post-consumer material is an end product that has completed its life cycle as a consumer item and would otherwise have been disposed of as a solid waste. Post-consumer materials include recyclables collected in commercial and residential recycling programs, such as office paper, cardboard, aluminum cans, plastics and metals.

**Recyclable** – the product is suitable for recycling through common methods. This product does not necessarily contain any recycled content.

**Recycled** – composed of materials that have been recovered. Recovered materials are wastes that have been diverted from conventional disposal such as landfills for another use. Recovered materials include both pre-consumer and post-consumer wastes. Pre-consumer materials are generated by manufacturers and processors, and may consist of scrap, trimmings and other by-products that were never used in the consumer market.

## Calendar Of Events

### OCTOBER

6 – Piloting Class
